

Company Background

Petrof, spol. s r. o. is one of the leading European piano manufacturers. Its biggest export markets include the USA, Canada, France, Germany, Italy, Russia, Japan, Australia, but also Taiwan, Hong Kong and many others. The company has already produced over 600.000 instruments during more than 140 years of its history.

The own production has quickly developed over the past decades so that there has been a great increase in production. The traditional handcraft skill of highly qualified and creative specialists has remained up to now. It is necessary to carry out the assembly and important operations individually. The precise industrial production using up-to-date machinery is linked with the professional skill of the most experienced craftsmen who give the instrument special features and above all characteristic tender, romantic and noble sound.

Upright pianos

Are manufactured in 3 basic heights: (118 cm, 125 cm, 130 cm).

The product range has 13 models manufactured in 15 surface finishes.

Grand pianos

Are manufactured in 7 basic lengths: (284 cm, 237 cm, 210 cm, 194 cm, 174 cm, 158 cm and 148 cm).

The product range has 12 models manufactured in 8 surface finishes.

Special features of grand pianos current construction are closely linked with the musical culture of Czech country. The musical instrument is a precious attribute craving for beauty above all and gives cultural experience to people. That is why the harmonic accord between acceptance and shape is the essential criterion for PETROF company.

The unique models prove that the PETROF company is capable and ready to satisfy wishes and requirements of highly demanding customers.
